HEXAGONE SPORT ROBOTICS

PROUD TO BE A MEMBER
OF THE 3 000 EXCELLENCE
FRENCH SME CLUB*

*BPI 2023

ALREADY MORE THAN **20 000** ROBOTS SOLD

A TRUSTED PARTNER

HEXAGONE MANUFACTURE, your partner in all circumstances.

HEXAGONE MANUFACTURE does everything to be always by your side.

We see ourselves not only as a manufacturer of efficient swimming pool robots but also as a reliable partner who supports you in your daily life.

With HEXAGONE MANUFACTURE your challenges are ours, your wishes and needs are our priority.

You benefit of our 35 years of experience, our high standard after-sales network, and also our excellent sector knowledge.

We guarantee robots with maximum reliability, suitable for all fields of application (Indoor and outdoor pools, natural pools, ultra filtration, buffer tanks).

Our goal is to make your daily life easier. Therefore, we put our customers needs first, we regularly carry out client satisfaction surveys, we systematically analyze each feedback and seek quick solutions to problems.

Feel free to contact us ! We are at your disposal.

For HEXAGONE MANUFACTURE, you are our priority !

CEO of Hexagone Manufacture, Mabis group

Yann Chouaqui

PRESENCE IN THE WORLD MAJOR EVENTS SINCE 2012

HOW TO HEXAGON

in a public and collective

HEXA LAB, Relevant innovations

Actively listening to customer needs

Hexagone has been designing and distributing swimming pool equipment around the world for 35 years. This significant experience makes it possible to offer public and commercial swimming pools high-performance machines, with characteristics often unique on the market.

Your requirements advance our innovation efforts. We're proud to be the industry leader and committed to transforming the way you work.

Hexagone is your daily partner.

- 18 new products in 24 months
- 1.2 million invested in R&D per year
- Nearly 10 international patents
- A team of 12 people within the Hexa Lab division

HEXA FAB, French made

A neo-industrial factory

Hexagone Manufacture celebrates the 20th anniversary of its French factory in Argenteuil with an expansion and technological improvement of the workshops and its logistics flow.

Our unique know-how is recognized throughout the world, respecting very strict standards, certifying the quality of products manufactured in France, reliability, traceability.

In 2023, the factory reached an important milestone by manufacturing its 20,000th machine.

- Factory of 7 500 m² near Paris
- 3,5 Millions d'euros stock
- A team of 35 builders

A team of

A structured and structuring company

With 35 years of existence, Hexagone Manufacture is made up of 4 distinct services which make the company successful:

- Hexa Lab: For the entire research & development part
- Hexa Fab: Supply Chain and Production

BECAME A LEADER

swimming pool in 35 years?

100 persons

- Hexa Com: Sales and After-Sales Service
- Hexa Bank: Finance and Growth

All our employees have know-how and interpersonal skills, more than 30 nationalities which make your experience unique.

HEXA COM, Direct from factory

Proximity and field presence

By working with Hexagone Manufacture, you have the certainty of working directly with a factory, without an intermediary. Our territorial ambassadors are there to support you throughout the life of your equipment in order to offer you the appropriate equipment, demonstrate it to you and see if it meets the expectations of your customers.

The strength of our company also lies in its incredible after-sales support.

Indeed, just as we are committed to selling you a machine, we are committed to maintaining it over the long term.

Contract or not, a Hexagon robot is never an orphan.

- Free on-site demonstration
- 12 workshop vehicles throughout the territory
- Presence in more than 70% of French swimming pools

HOW HEXAGONE

becomes an eco-committed factory

FABRIQUÉ
EN FRANCE

Strengthening Made in France

QUALITY PRODUCTS WITH LOCAL SUPPLIERS

Our products are made up of parts mainly manufactured in France and the European Union. The goal is to relocate as many processes as possible and to ensure monitoring of the quality, reliability and traceability of our products, always mindful of the environment.

A united company

ANCHORED IN ITS TERRITORY AND PROMOTING DIFFERENCES

By developing learning, by committing to the region in an ecological and supportive approach, by promoting gender parity, by integrating Ukrainian refugees and people with disabilities, the Hexagone company is committed.

TEE commitments

INVEST IN ECO-RESPONSIBLE INFRASTRUCTURE

Hexagone takes additional steps every day to promote eco-responsibility with its carbon footprint, switching to LEDs in workshops and logistics, putting special paint against the sun's radiation on the roof, changing vehicles in order to always meet the latest standards.

1. COLLECTION IN YOUR POOL

2. DISPATCH AND SORTING OF MATERIALS

Recovery & recycling

TRANSFORMS

with his Hexapülse plan?

4. REUSE

3. RECYCLING
AND REPAIR

RESPECT THE ENVIRONMENT

- With Hexagone and its unique after-sales service, we reprocess our motors, pumps, electronic cards and cables for a second life in 85% of cases.
- The stainless steel chassis as well as our trolleys are recycled.

Easy maintenance & repair of products

OUR OBJECTIVE: MAXIMUM REPAIRABILITY INDEX

Hexagone is for planned sustainability, the opposite of planned obsolescence. Everything is designed from the start to be dismantled and reused. All parts are reused.

Eco conception

MAXIMUM OF NOBLE MATERIALS

All our equipment is designed with the permanent ambition of reducing electricity, water and detergent consumption while remaining efficient. The choice of a stainless steel frame compared to a plastic frame which will resist time better..

Volunteering

SPORT IN THE CITY

A new generation company is a committed company. Hexagone is one of these by partnering with non-profit associations such as "SPORT IN THE CITY" which supports the integration of young people.

A professional robot that climbs walls

The SPOT has sensor technology available to help it navigate your pool optimally.

Equipped with a radio control, it responds to the finger and the eye. With its automotive-style notched tracks and its **management system**, the SPOT is capable of **climbing slopes, climbing walls** and removing drains with complete peace of mind.

With its Multiflux axial turbo pump and its **2 different filter finenesses**, nothing escapes it, from small dust to large stones.

Comes with a **professional trolley** that will allow you to store the robot, its cable and its power supply easily.

Scrapes and vacuums the bottom of the pool

Without compromise, the PEPS robot vacuum cleaner comes from more than 35 years of experience in the field of robots for public and collective swimming pools.

Robust with its stainless steel chassis, it is the ideal tool for your daily life. Equipped with a **touch screen**, you will choose the way you want to operate it today (manual, Magellan or systematic). With brushes rotating **3 times faster** than the robot wheels, the PEPS **scrapes the floor and tile joints** like no other.

BIOFILM

The boundaries of the nano-world:

Living world

Pool robots cannot filter at less than 5 microns, so cannot retain viruses and biofilm. It absolutely need to go back into your main filtration because your filtration knows how to do it.

VIKING KIT FOR CHRONO

- Pumps and extracts the biofilm from the bottom 5 cm
- Reduces chemical consumption
- Allows bacteria to be extracted from the bottom of the pool
- Substantial drop in chloramine levels
- The robot becomes the armed wing of your filtration

HYBRID

DARK CLEANER

The 1st buffer tank robot in the world

Even **invisible particles** can now be caught by our robots.

It is in the **biofilm** that bacteria, viruses and pathogens hide.

Our new technology consists of **extracting the biofilm** from the bottom of the pool to evacuate it either into **your main filtration** or **into the waste**.

By eliminating the biofilm, we prevent chlorine from fighting it and thus creating additional **chloramines and THMs**.

Working conditions are improved when cleaning the buffer tank.

ROBOT
FOR
BUFFER
TANK

The power to extract algae and leaves.

With our impressive internal and external dual pump power, the BioMatic meets the needs of natural Pools.

Operating principle: water laden with algae is **pumped, pre-filtered in the robot** then routed through our **external filtration**, blocking fine and clogging particles so that **clean water can be returned** to the pool.

The advantage is a **clean pool** and **better oxygenation** of the water while preserving the balance of your water **without adding new water**.

Its implementation is easy, the robot works **autonomously** and **manually**.

FULL SERVICE RENTAL CONTRACTS

ANNUAL OR SEASONAL OPENING

OPT FOR COMPLETE AND CLEAR RENTAL AND MAINTENANCE CONTRACTS

It is essential that you have **understandable and complete information on the guarantees** of your rental and/or maintenance contracts.

Hexagone has opted for **readability** and **maximum simplification** with:

- **unique coverage** to guarantee you **all the parts of the robot** whatever the breakdown incurred during the contract years (excluding breakage);
- an **unlimited labor and travel**, package, meaning that we travel to site as many times as necessary with the “HexaBox” contract;
- The insurance of a **loan robot** if you are unable to repair the breakdown within 72 hours.

Choose a company that offers **complete, clear and readable contracts**, this is the assurance of a clean swimming pool and peace of mind!

HEXABOX ANNUAL FULL SERVICE

At any time, you have the guarantee that your robot will be ready for use and you can anticipate your costs well in advance.

LLD OFFER of 48 or 60 months with MAINTENANCE INCLUDED:

- Equipment of your choice,
- After-sales service included with unlimited parts, labor and travel,
- Loan material if necessary.

The advantages:

- Guaranteed peace of mind thanks to the payment of monthly rents with maintenance included,
- A controlled budget thanks to fixed monthly rents with no surprises,
- Support from our technicians to prevent abnormal wear or misuse of your robots during the duration of the contract.

HEXABOX SEASON FULL SERVICE

SEASONAL RENTAL WITH MAINTENANCE

90 or 150 days of seasonal rental:

You have a seasonal swimming pool, which only works in summer, HEXAGONE **has the solution**.

- A rental of 3/4/5 or 6 MONTHS for 4 YEARS!
- We ensure delivery, commissioning and maintenance by our regional technician.
- At the end of the season, we take the robot back to put it into operation “**wintering**” in our workshops, after having checked, revised and controlled it.
- From the start of the season, we re-deliver your robot to you, so throughout the winter season the robot remains in our workshops protected from bad weather!
- If you change personnel, no problem, our regional technician, your partner, remains at your disposal to provide instructions for launching and operating the robot.

REPAIR YOUR ROBOT

CONTRACT OF HEXAFIX MAINTENANCE

ALL INCLUSIVE (FULL SERVICE):

- 1.** Telephone assistance 5 days a week, from 7:30 a.m. to 6:00 p.m.,
- 2.** Unlimited on-site interventions,
- 3.** **DAWN INTERVENTION, FROM 5:30 A.M. TO 8:00 A.M. IN YOUR POOL,**
- 4.** Parts, labor and travel fully covered unlimited under the Hexafix contract, excluding breakage,
- 5.** Totally free workshop-factory return,
- 6.** Equipment guaranteed for life during the duration of the contract,
- 7.** Loan robot during prolonged immobilization,
- 8.** Permanent support thanks to a range training and services on site or in the factory workshop,
- 9.** Fixed annual lump sum price, respected budget.

INTERVENTION ALL OVER FRANCE

A FLEET OF WORKSHOP VEHICLES FOR TECHNICIANS AND SALESMEN RENEWED EVERY 2 YEARS

for a reduced carbon footprint with systematic reduction of CO2 emissions to Euro 6 standards, also including 1 100% electric vehicle.

NO TO OBSOLESCENCE SCHEDULED

REPAIR IS: EFFICIENT, ECONOMIC & ECOLOGICAL

95% of our robots are repairable on site. Speed of interventions. Availability of spare parts with truck stock managed by SAP. A 100% PRO quality service, management of the technicians' collaborative calendar.

QUALIFYING TRAINING TECHNICIANS

COMMISSIONING INCLUDED IN THE PURCHASE OF THE ROBOT (3 LEVELS OF TRAINING)

We organize training for swimming pool staff on the use and maintenance of the machine. Small maintenance only requires a few minutes per week and a self-diagnosis is included in each machine.

REMOTE DIAGNOSTICS AND TUTORIALS WITH **VISIOFIX**

WITH VISIO FIX, HEXAGONE MANUFACTURE CUSTOMERS CAN CHAT VIA WEBCAM WITH A CONSULTING TECHNICIAN

This videoconferencing service enhances the understanding of the customer problem and promotes decision-making by the consulting technician on the course of action to take. Accessible both on computer and smartphone.

ON SITE WITH OUR SERVICE

NATIONAL ASSISTANCE, LOCAL PRESENCE

No breakdown between us!
Our advisors support you non-stop from your
request until the end of the intervention

RESPECT THE ENVIRONMENT

COLLECTION, RECYCLING, RECOVERY, TRACEABILITY

- With Hexagone and its unique after-sales service we reprocess our motors, pumps, electronic cards and cables for a second life in 85% of cases.
- The stainless steel chassis and trolley as well as all stainless steel parts are recycled.

FIRE FIGHTING HELPO'

IN CASE OF EMERGENCY:

NEW

- 1- Call firefighters in 15 minutes on average
- 2- During this time your Helpo' serves as a shield

Fire protection motor pump via pool water

The average volume of a swimming pool corresponds to 4 to 5 canadiers. A significant quantity that you can count on while waiting for the firefighters. Bring your HELPO' closer to your pool, immerse the suction pipe, deploy the discharge pipe and you are ready in a few minutes to slow the spread of a fire.

CUSTOMIZED AQUAFITNESS TRAINING!

3 reasons to organize aquafitness classes with Hexagone:

1- Our qualified instructor

Simon Rives :

Your Butterfly, Aqua bike, Aqua Jump and Aqua fitness instructor!

- former polo player
- student in STAPS and BE
- a pronounced taste for carrying out choreographed lessons

2- Our educational approach

- Analysis of your working conditions
- Program adapted to your needs and according to your abilities
- On-site courses with experienced professionals (up to 15 people)
- Consultations and support by telephone or video conference during the 2 months following the training
- Certification and development path
- Educational support, a list is provided to you for each training as well as the corresponding musical playlist

3- Our programs

Designed in partnership with physiotherapists and following numerous physiological studies Synchro Swim Sound is a built-in underwater on the benefits of water through sport

Level 1 "Beginner": basic training day, 6 hours

Level 2 "Advanced": thematic training, 8 hours

• Aqua bike • Aqua jump • Butterfly • AquaGym • Aquaparcours...

Level 3 "Professional" :

- specialized training, 8 hours
- pre/post natal programs
- circuit training
- post breast cancer program
- tailor-made program according to your expectations

BABY SWIMMERS & HIS COMFORT

THERMAL COVER

SAVINGS

WHY IMPLEMENT COVERAGE?

What are heat losses?

- **Evaporation:** up to 70% of heat loss, evaporation is the main cause of water loss in a swimming pool.
- **Thermal radiation:** up to 25% thermal loss. Any body emits therefore naturally loses heat. Water is no exception. Clear nights accentuate this phenomenon, and the sun's radiation is not enough to counterbalance it during the day.
- **Heat transfer by convection:** up to 25% loss, the heat of the water escapes by convection with the cooler ambient air. The effect is accentuated by the wind.
- **Conduction** is heat transfer due to direct contact between materials.

QUICK RETURN ON INVESTMENT

Your facility can start **saving money** as soon as **the thermal blanket is in place**. In most cases, a pool can **recoup its investment in a cover system between 12 to 24 months**.

Regular use of a thermal pool cover **insulates the pool** during off-peak hours and can therefore **reduce heating costs**, chemicals, water changes and cleaning time.

By reducing the phenomena of evaporation and water renewal (several m³ per year varying depending on your pool), you **reduce your water bill**. By **reducing** heat losses and the supply of renewal water, you **heat less**, therefore you **reduce your electricity consumption**.

Here are measurable and measurable savings!!!

CONSUME LESS WATER AND
SAVE ENERGY BY INSTALLING
A COVER.

REDUCE YOUR OPERATING COSTS

• Reduce evaporation from the pool.

During periods of high heat, **the water in your pool evaporates**.

This is particularly the case at the start of the night, when the outside temperature drops and becomes lower than that of the water. **Evaporation should not be taken lightly as it is the main cause of water loss.**

CUSTOM-MADE SHAPES

AND ITS IMPLEMENTATION

**CUSTOM
MADE**

www.myhexagone.com

YOU WILL USE THE COVER ONLY IF IT IS EASY TO IMPLEMENT,

THE CHOICE OF THE COVER (length/width) DETERMINE WHICH REEL NEEDED

COVERS/TARPS

Foam cover 6mm

6mm. Lined around the entire perimeter.
Blue color.
Reference z218f75009 per M²

8mm foam cover

8mm. Bordered on both widths.
For swimming pools up to 50m. Closed cell foam.
Blue color.
Reference z074v-sim002200 per M²

ECO bubble cover

400 gr/M².
For swimming pools up to 20 m. Soft bubbles.
Translucent.
Reference custom-made NC per M²

Floating stiffener

For large "foam" covers. Positioned on the width opposite the roller, it makes it easier to handle the tarpaulin without it sinking into the water. We can only make stiffeners on the straight parts.

Rounded roofs cannot be manufactured with a floating stiffener.

Reference z218f79901 per M²

Winterizing net

235 gr/M². In polyethylene. Fixings suitable for wooden or concrete surfaces. Opacity of 89% to combat photosynthesis while allowing water to flow.

Reference z074fv-shfs30100 per M²

Winter float

During periods of frost, the ice compresses the float which thus absorbs the thrust of the ice. The winter floats are attached to each other to form a chain that is installed diagonally across the pool.

Ensuring the playing quality of your synthetic turf on a daily basis

Robotization helps you maintain your regulatory compliance

Efficient, regular maintenance without risk of fiber damage

- Improves playability (ball roll, ball bounce, vertical deformation and rotational resistance).
- Reduces the risk of injuries (sprain, fracture and cuts)
- Maintains the longevity and quality of the playing surface (density, fiber strength, homogeneity)
- Contributes to better cushioning of the installation (increases the lifespan of the carpet)
- Provides an electronic logbook of your (better monitoring) maintenance cycles
- Allows you to maintain the playing area and its surroundings (assistant referee corridors, warm-up areas, behind the goals, sidelines)
- Avoids the scattering of fiber filaments as well as granulate outside the playing area

Switch to robotization

BUKY ONE

OUR 3 TOOLS

The depth of the brush or the claws adjusts according to your terrain and its condition

Brush to straighten the fiber

- Brush widths: 120 cm
- Nylon brush

ECOLOGICAL:

Captures used fiber filaments and prevents them from being scattered in nature.

Decompression of the filling material

- Decompaction with adjustable depth

ECOLOGICAL:

Brings the aggregate back to the center of the ground and prevents it from being sprayed outside.

Magnet for metal pick-up

- Attracts small metal objects (hair clips, barrettes, fence hooks, etc.)
- thus reducing the risk of cuts.

GENERAL CONDITIONS OF SALE HEXAGONE MANUFACTURE S.A.S

I GENERAL SALES PROVISIONS:

I.1. APPLICATION AND ENFORCEABILITY OF THESE GENERAL CONDITIONS

These general conditions of sale (hereafter, "GCS") apply systematically to every buyer (hereafter "the Customer") with the current Hexagone Manufacture S.A.S. tariff, allowing him/her to place an order. As a result, the fact of placing an order implies full acceptance without reservation by the Customer of the GCS. No specific condition may, except in cases of formal and written acceptance from Hexagone Manufacture S.A.S., prevail over the GCS. In the absence of express acceptance, no contrary condition may be raised in objection with Hexagone Manufacture S.A.S. by the Customer, regardless of the time when it may have been brought to its knowledge.

The fact that Hexagone Manufacture S.A.S. does not avail itself at any given moment of any one of these GCS may not be interpreted as a waiver of the right to avail itself of this at a later date. These GCS prevail over any Customer general conditions. These GCS apply to all countries.

I.2. ORDER:

Order means any order relating to products which appear in our tariffs, and accepted by Hexagone Manufacture S.A.S.. Offers made by our agents or by telephone shall only constitute a commitment on our side after written confirmation from us. The Customer shall be deemed in agreement with the content of our confirmation if, within eight (8) days, he/she has not shared his/her observations with us in a written registered mail with acknowledgement of receipt. In the absence of any written observation, the order shall be deemed irrevocable. The order is non-transferrable and may not be transferred without the agreement of Hexagone Manufacture S.A.S..

I.3. ORDER FULFILMENTS:

We reserve the right to make any modifications or improvements we deem necessary to our products at any moment, without this serving as grounds for a Customer to cancel an order, or requiring us to make any modifications or improvements to previously-delivered products.

I.4. CANCELLATION OF ORDERS:

No order can be cancelled by our Customers without our prior and express agreement.

In any case where Hexagone Manufacture S.A.S. should accept the cancellation of an order, any deposit paid by the Customer shall be retained by us in compensation.

I.5. DELIVERY:

Deliveries are carried out by freight forwarders either directly to the Customer or via a carrier.

1.5.1. DELIVERY TIMES:

Delivery times as well as transportation times are determined on a case-by-case basis and are entirely indicative and without guarantee. Unless there is a contrary agreement, they shall never constitute a commitment on our side. Any delay to delivery shall not constitute grounds to terminate the order, or grounds for refunds, damages or interests, deductions, compensation, cancellation of the current order or the refusal of goods, as well as any kind of indemnity. In cases of force majeure, and especially: fire, flood, discontinuation of product, machinery breakdown, war, riots, requisition, required reduction of imports, accident or manufacturing delay at our suppliers, delay to transportation of goods, as well as in cases of the occurrence of any event beyond our control which prevents the execution of the contract under normal conditions, whereby manufacture and/or delivery have been prevented or delayed, then our contractual obligations shall be suspended for as long as the case of force majeure exists, without any responsibility borne by Hexagone Manufacture S.A.S., even if a firm timescale has been confirmed. If the case of force majeure should continue for longer than forty-five (45) days, the more diligent party may, if it wishes, cancel the order affected by the case of force majeure without either of the parties laying claim to the payment of damages and interests.

1.5.2. TRANSFER OF RISKS

The transfer to the Customer of risks of loss, theft or damage of goods sold, as well as the damages these may cause, shall be effective from the moment the courier takes possession of the order. The Customer shall, as a result, take out insurance covering these risks pertaining to the reception of goods for delivery by the courier.

1.5.3. TRANSPORT

Unless otherwise stipulated, delivery shall be made by our accredited couriers with shipping costs billed to the Customer in addition to the price paid for the goods. Hexagone Manufacture S.A.S. cannot be held responsible for damage which occurs during transportation or unloading. Goods shall always travel at the Customer's risk, even in case of returns or despatches sent carriage paid or C.O.D. The Customer shall be responsible for checking that the goods are in good condition at the moment of delivery. They shall also check the quality, quantity and reference of goods, as well as that they match the original order. The Customer shall relay, where necessary, any concerns to the courier concerning missing and/or damaged goods, the type of damage and the extent thereof. These concerns must be communicated to the courier by the Customer by extra-judicial act or registered letter with acknowledgement of receipt within three (3) days, not including bank holidays, of the reception of said goods (article L133-3 of the French Code of commerce); one copy shall also be addressed to Hexagone Manufacture S.A.S..

All recourse shall be sought from the carrier. Where, in accordance with reasonable commercial standards, Hexagone Manufacture S.A.S. carries out additional transportation operations, such as loading, wrapping, securing, taking out an insurance policy, customs formalities etc. it shall only act as a representative of the consignee who retains their responsibility for the cost, risks and perils of such operations.

I.6. COMPLAINTS AND RETURN OF GOODS

Without prejudice to claims made against the carrier by the Customer, such as those included in article 1.5.3., in the case of visible defects or missing products, any complaint, whatever its nature, relating to delivered products, shall only be accepted by Hexagone Manufacture S.A.S. if it is made in writing, by registered letter with acknowledgement of receipt, within fifteen (15) days following the delivery date.

No goods may be returned without our express agreement and goods may only be returned if fit for resale. The Customer shall allow Hexagone Manufacture S.A.S. to verify any defects to allow for these to be remedied. He/she shall abstain from intervening themselves or from seeking intervention from a third party. The cost and risk of returns shall be borne by the Customer at all times. Any goods returned without our agreement shall be made available to the Customer and shall not lead to the establishment of an asset. Justified returns shall be subject to a replacement of the product as

deemed most appropriate by Hexagone Manufacture S.A.S. in light of the Customer's needs or, where it is impossible for us to do so, a credit shall be made to the Customer after we have verified the quality of the returned machine, which shall exclude any compensation or damages and interests, deduction of the price of usable accessories, missing equipment and the cost of returning it to good working order. In cases where Hexagone Manufacture S.A.S. accepts the return of goods in conformity with the initial Customer requirements, the purchase price of said goods shall be paid to the Customer to a maximum of 75% of the billed value.

I.7. PRICE AND PAYMENT

1.7.1. Prices, information and technical characteristics which can be found in our catalogues, tariffs, prospectus, technical specifications or other documents are indicative and cannot be deemed firm offers. These documents have no binding nature and can be modified at any moment and without prior notice. Our prices are expressed in Euros. Any taxes, duties or other contributions to be paid in accordance with French legislation and regulations, or those of an importing or transit country shall be borne by the Customer.

1.7.2. Our materials are always billed at the current tariff at the moment when the order is confirmed by Hexagone Manufacture S.A.S., and are less tax from the moment they depart our headquarters in Argenteuil, carriage and packaging not included.

1.7.3. A fixed sum of 21 € less tax on charges for all invoices of under 80 € less tax.

1.7.4. Our invoices are payable upon reception unless a different payment schedule is indicated on the invoice. Only the cashing of a paper instrument or cheque or the reception of a bank transfer shall be considered as valid payment under these GCS. In cases of payment by bills of exchange, the Customer is required to return the accepted paper instruments presented to them within a maximum of seven (7) days. Any amount including tax not paid within the allotted time shall give rise to a payment by the Customer of delay penalties fixed at 3% per month's delay, as well as a fixed rate of compensation to cover losses to our Company of a total of FORTY (40) EUROS. If the recovery costs are greater than the amount of said compensation, our Company shall then seek, with supporting documents, additional compensation (Articles L.441-6 et D.441-5 of the code of commerce).

1.7.5. Recourse to our warranty obligation or any other demand of any kind that the Customer may make shall not allow him/her to in any case or under any pretext retain or delay payments owed to us, it is also expressly required that any delay or failure to pay should lead to the ceasing of recourse to our warranty and agreements.

1.7.6. Our sales are made fully and without exception at our Argenteuil headquarters, unless otherwise specified. Acceptance of our bills of exchange or payment by any other means shall not constitute either a renewal or a derogation from this clause.

1.7.7. Failure to accept our drafts or payment default at the expiry of a bill of exchange or an invoice, and whatever the mode of payment or in cases of cessation of activity or cessation of funds, shall lead to the forfeiture of the term, requiring that all debts to us, including those not yet expired, be paid immediately. It shall also lead to the suspension or resolution of tenders, contracts and orders in progress, without possibility for the Customer to argue an unjustified refusal of sale, or claim any kind of compensation.

1.8. TRANSFER OF PROPERTY – OWNERSHIP RESERVE CLAUSE

Hexagone Manufacture S.A.S. reserves ownership of goods sold until effective payment of the full price for the main goods and accessories, even in cases of granting of payment terms. The Customer may in no case resell, pledge or grant a guarantee on the good delivered and not fully paid for. Payment default on any deadlines may lead to goods being reclaimed. Where reclaims are made, deposits already paid shall be retained by Hexagone Manufacture S.A.S. in compensation.

II WARRANTIES AND RESPONSIBILITIES:

II.1. Goods must be verified by the Customer upon delivery, and any complaint, reservation or dispute relating to missing goods or apparent defects should be made within the provisions of article 1.6. In case of apparent defects, defective parts shall be replaced by Hexagone Manufacture S.A.S. or the goods replaced, subject to verification of the alleged defects. The Customer shall supply any documentation or elements which demonstrate the extent of observed defects. No complaints can be made by the Customer more than fifteen (15) days after the delivery of the goods. Indications of performance, speed, consumption power, weight etc. are only given on an indicative basis and without any commitments or guarantees on our side, any inaccuracies may in no case give rise to the termination of an order or a request for compensation.

II.2. Our products are aimed at professionals, and as such should only be handled by individuals who have received free training on the product offered to the Customer by Hexagone Manufacture S.A.S. or its accredited distributor. Our pool cleaners are guaranteed against any material and construction defects for a period of twenty-four (24) months from the delivery date and for up to 1200 hours of use. Our devices other than pool cleaners are guaranteed for 12 months from the delivery date. Our warranty only applies to products which have become the property of the Customer.

II.3. We shall no longer be bound by our warranty obligation in cases where the warranty terms on some aspects of our products are breached without our express agreement.

II.4. Our warranty is limited to the replacement or repair of parts which we deem defective, excluding any other damages.

II.5. Hexagone Manufacture S.A.S. accepts no responsibility in cases of operating losses, loss of time or of any other indirect loss caused by its goods. The Customer must seek a substitute to defective equipment. Furthermore, the client shall comment on the usage scope of the equipment in case of defects observed on the material by themselves or in the place of use or on their mode of use.

II.6. All standard new or exchanged spare parts are guaranteed for 6 months for a maximum 500 hours of use.

II.7. Warranty on consumable parts. Filters, brushes, crawlers, belts, cables, trolley tyres are considered consumable parts, whose warranty is limited to 6 months and a maximum of 300 hours of use.

II.8. Exclusions to warranty in the following cases:

damage and wearing resulting from a special, abnormal or otherwise application or assembly, carried out by the Customer or a third party without prior and written agreement from Hexagone Manufacture S.A.S.; use of our goods in conditions of use or performance which do not conform with the technical specifications of Hexagone Manufacture

S.A.S., and more generally inappropriate or clumsy usage; damage or accident caused by the intervention of an employee of the Customer not trained to use the product or a company not accredited by Hexagone Manufacture S.A.S.; defects and/or damage to goods following maintenance not carried out in line with Hexagone Manufacture S.A.S. recommendations or failure to maintain, or irregular storage and/or conservation conditions by the Customer; whereby the Customer fails to notify Hexagone Manufacture S.A.S. in writing (specifically by fax or email) from the moment they observe the defect to the product under warranty and whereby they maintain in service a part or section of the defective product which may lead to further and more significant damage to the product or to the place of use. Malfunctioning as a result of normal wearing (e.g.: snapped belts, dead remote control batteries, bare brush-heads, etc...) or linked to problems with linings of and/or to specific shapes of pools which do not conform with the specification table required by Hexagone Manufacture S.A.S.; breakdown as a result of incorrect electrical installation, current fluctuations, poor connections or even the failure to observe by the Customer the electrical standards in force in the country of use; damage caused by external accidents: fall, transportation, fire, flood, melting, blackout, short-circuit, as well as accidents such as shocks, power-cuts, the introduction of foreign objects and/or liquids (acid, cleaning product, chlorine, water, tropical rainfall, etc...); where a third party or the Customer themselves has opened the electric control box and/or the engine or pump or gyroscope without our written agreement. The anti-corrosion warranty does not apply to sulphuric water or that without daily cleaning with stainless steel clear water. As a result, Hexagone Manufacture S.A.S. shall not be held responsible for material damage or accidents suffered by individuals as a result of one of the cases listed above.

Shipping and returns costs incurred by the application of the warranty shall be borne by the Customer.

We accept no responsibility for damage caused to property due to our products following an equipment failure or a construction defect to equipment sold.

PLEASE NOTE

The length of warranty for the defective equipment or part under guarantee shall be extended by a duration equal to the time spent in our servicing department where this is longer than a week. Outside of warranty repairs are subject to an estimated charge of 150 Euros less tax. This amount is only due if the Customer turns down repairs. Any parts delivered by Hexagone Manufacture S.A.S. shall be invoiced at the moment of delivery. In cases of warranty claims, said defective piece shall be returned to Hexagone Manufacture S.A.S. within a month maximum for assessment and work. Beyond this time, we can no longer accept it. Hexagone Manufacture S.A.S. shall in no case be held solely responsible for the cleanliness of pools. It is therefore recommended that the Customer always have access to a substitute for a defective machine. If a technician from Hexagone Manufacture S.A.S. should establish that the breakdown is not covered by warranty, the technician may invoice for the uncovered problem in line with the current tariff. Following testing of equipment under guarantee whose defect has not been found during servicing, the Customer shall be billed for the time spent looking for the defect.

Mode of intervention: you can contact the technical service by calling 0134341155 or any other Hexagone Manufacture S.A.S. agency. For work done under warranty, equipment or parts may only be sent to the following address: Hexagone Manufacture S.A.S., 34 rue du Perouzet, 95100 Argenteuil, France, quality service.

To request work under warranty, the Customer must fill in a sheet authorising the work, including the device's serial number, the in-service date, the number of the replacement part, as well as observations regarding the defect observed.

III. INDUSTRIAL PROPERTY:

Any technical documents sent to our clients remain the exclusive property of Hexagone Manufacture S.A.S., the sole holder of intellectual property rights over these documents, and must be returned to us upon request. In accordance with laws currently in force, it is forbidden for customers to fully or partially reproduce our technical and commercial documents and to make any use of them which is liable to violate the industrial or intellectual property rights of our company. The Customer shall undertake not to divulge these to any third party.

IV. INTERNET

We reserve the right to ask for removal of our products from sale on a website which does not respect our commercial policy in terms of price and trading conditions.

V. TERMINATION CLAUSE

In cases where any one of the Customer obligations is not respected by the latter, sale may be terminated fully within rights, and goods returned to Hexagone Manufacture S.A.S. as it sees fit, without prejudice to any damages or interests which Hexagone Manufacture S.A.S. may assert to the Customer, within 48 hours after a formal notice which goes unanswered. In this case, Hexagone Manufacture S.A.S. is within its rights to seek a fixed rate of compensation of 15% of the total sale price from the Customer, as well as default interests and any legal fees incurred.

VI. PROFESSIONAL WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (EEE)

In accordance with the provisions in articles R543-195 and R543-196 of the Environment Code modified by Decree n° 2014-928 of the 19 August 2014, our Company has hereby joined the accredited eco-body LOXY at Parc d'Activité du Vert Galant 17 rue Antoine Balard – 95310 Saint-Ouen l'Aum. ne (RCS Pontoise 482.644.952) with a view to ensuring the collection and treatment of professional waste electrical and electronic equipment.

VII. APPLICABLE LAW – ATTRIBUTION OF COMPETENCE

The application is governed by French law. The application of the Vienna Convention on Contracts for the International Sale of Goods is specifically excluded. Any dispute relating to the forming, implementation or termination of contractual obligations between the parties which does not lead to amicable settlement shall be referred to the French courts. In case of any dispute with professionals and/or merchants, this shall be referred to the TRIBUNAL OF COMMERCE OF PONTOISE within whose area of jurisdiction Hexagone Manufacture S.A.S.'s headquarters is situated, whatever the conditions of sale and mode of payment accepted may be, even in cases of incidental claims, warranty appeal or of more than one respondent, Hexagone Manufacture S.A.S. reserves the right to refer the case to the competent local jurisdiction where the Customer's headquarters are situated.

VIII. PARTIAL NULLITY

If one of the clauses or provisions of these GCS should be annulled or declared void by a definitive court ruling, such nullity or void nature shall be without prejudice to the other clauses and provisions, which shall continue to apply.
